

Regulatory definitions for Australia and New Zealand

This document sets out the regulatory definitions of:

- The Declared Articles under the **NSW Electricity (Consumer Safety) Act 2004**; and
- Reference clause of Level 2 and 3 in-scope-equipment under the Electrical Equipment Safety Scheme (EESS) as published in **AS/NZS 4417.2 Appendix B2 (Combined AS & NZ) and B3 (additional requirements for New Zealand) Level 2 equipment**. The Appendix B definitions are [bracketed].

The Class Specifications or Standards listed at the end of each definition reflects those listed in the New South Wales legislation. These may vary from the requirements in AS/NZS 4417.2. SAA product certification process will use the NSW requirements for Declared Articles or where appropriate, the latest version. For Non-Declared articles the current version will apply.

All electrical products that fall within one of the following definitions must have certification prior to sale. If you are uncertain if your product is declared please contact SAA Approvals.

A Class Specification that is in the course of being replaced by another Class Specification or Edition, the date when replacement Class Specification takes force is in brackets.

NOTE:

Where reference is made to a "part 2" specification, such as, AS/NZS 60335.2.2, AS/NZS 60598.2.1 or AS/NZS 61347.2.3 it also includes the base specification as per AS/NZS 60335.1, AS/NZS 60598.1 or AS/NZS 61347.1 respectively.
